Quick & Easy Updates

posted from any internet browser

Posting homework, news announcements and upcoming events to your website is as quick and easy as sending an email.

Teachers can use our quick post blogging feature to add photos, videos, even homework to class pages without any coding experience required.

Everything is managed through a secure, intuitive admin site. School administrators set each user's level of access and can add or remove users at any time.

We even help get you started by pulling static content from your old website, based on the sitemap you provide.

Put updates in the hands of those who want it done now.

Custom Design

to showcase your brand

Every Scholantis Cloud website is hand-crafted by our team of designers and curated by a dedicated project manager. We get to know your organization and design your site based on your brand, your traditions, your spirit.

Responsive design included!

You'll get the best viewing experience, no matter what device you're on.

Friendly Support

every step of the way

Learn how it all comes together with an introductory training session.

Our tech support staff of friendly folks in Vancouver are available to answer any questions you may have or to talk you through setting up a new department section.

With a team of engineers working hard behind the scenes, our CMS is always evolving. Feature enhancements and software updates are meticulously released at no extra cost.

You also get fully-supervised, redundant website hosting in Azure™ (Canada), and all systems are monitored around-the-clock for stability and security issues.

From managed hosting to technical support, we've got you covered!

School and District Websites

that makes communicating simpler

We power dynamic, custom-designed websites for schools and districts. Our web-based content management system is hosted in Azure™ (Canada) and is powered by Edlio. It is packed with features designed specifically for teachers and school administrators and is a perfect fit for educational organizations.

Meet Edlio...

Edlio work with over 5,000 schools and districts in North America and now Canada, in partnership with Scholantis. Their team of: engineers, designers, project managers and support staff work together to transform education with the most efficient tools for schools and districts, with the core value of connecting schools to their communities. With over 16 years of expertise, they understand what schools need for excellent communication and collaboration.

We'd love to show you more. Call us for a demo.
